

Dear Senator,

I am writing to urge your committee to approve the full and frank disclosure of all palm oil products used in Australian foods and groceries. It is imperative you give Australians a clear understanding of what they are purchasing and why their choice not to use palm oil will have a significant impact on the future of animals such as Orang Utans, Elephants and Tigers in Sumatra, Borneo, Indonesia and other south east asian countries.

I urge you to take this step to allow consumers a free and fair choice when making their purchases.

Please, for the sake of the future of these endangered animals, make Palm Oil come clean on food labeling

best wishes

stella kinsella
