

Dear Committee,

I'm writing this letter in support of nuclear power and believe that there is growing community support around the consideration of nuclear power as an alternative to other forms of power generation.

I also believe that at the very least, the option to be able to discuss and debate nuclear power in our political forums are an essential right to enable good policy outcomes, without being politicised in outdated historical propaganda and cultural dogma pushed by politicians.

I believe It's time for Australia to have an open, modern inclusive discussion about nuclear power. Australia has rich reserves of both uranium and thorium which are required to generate nuclear power. This in itself should be a good enough reason to consider a rational debate.

There's no doubt public support is growing, so I call on the committee to accept my submission in the support of nuclear power and convey this support onto to the inquiry.

Thank you for the opportunity and your hard work in compiling these submissions

Warm Regards

Nunzio Grimaldi
