Inquiry into Pathways and Participation Opportunities for Indigenous Australians in Employment and Business

Prime Minister and Cabinet Portfolio

Department/Agency: National Indigenous Australians Agency

Topic: Indigenous Procurement Program – Amount

Member: Leaser

Question reference number: 0008

Type of question: Written

Date set by the committee for the return of answer: 02 August 2021

Number of pages: 1

Question:

Tell us about the Indigenous procurement program in your department. What is the amount you are spending annually with Indigenous Suppliers? What percentage of your procurement does that amount to?

Answer:

The National Indigenous Australians Agency (NIAA) is responsible for the whole of Commonwealth Indigenous Procurement Policy (IPP) which applies to all non-corporate Commonwealth entities subject to Commonwealth Procurement Rules. The NIAA has embedded the requirements of the IPP into its culture and procurement processes.

In 2020-21, the NIAA spent \$11.5 million on new and varied contracts with Indigenous business. This represents 13 per cent of all contracts published on AusTender. Note that the 2020-21 financial year reporting is still being finalised and this number is subject to change.

In 2019-20, the NIAA spent \$7.13 million on new and varied contracts with Indigenous business. This represents 20 per cent of all NIAA contracts published on AusTender.

Question reference number: 0010

Type of question: Written

Date set by the committee for the return of answer: 02 August 2021

Number of pages: 1

Question:

How has the volume and percentage of Indigenous suppliers changed for your Department over the last decade?

Answer:

The National Indigenous Australians Agency (NIAA) was established on 1 July 2019. Prior to this, the NIAA was a part of the Department of the Prime Minister and Cabinet (PM&C).

Since the establishment of the Indigenous Procurement Policy (IPP) in 2015-16, there has been an increase in the volume and percentage of Indigenous suppliers as outlined below:

- In 2015-16 3.8 per cent (31 contracts) of the total number of PM&C contracts published on AusTender, were awarded to Indigenous businesses.
- From 1 July 2020 to 31 May 2021, 20 per cent (63 contracts) of the total number of NIAA contracts published on AusTender were awarded to Indigenous businesses.
- Note that numbers as at 30 June 2021 are still being finalised.

Topic: Indigenous procurement program – services provided

Member: Leaser

Question reference number: 0011

Type of question: Written

Date set by the committee for the return of answer: 02 August 2021

Number of pages: 1

Question:

What services do the Indigenous businesses that you procure through, supply?

Answer:

The National Indigenous Australians Agency (NIAA) engages Indigenous business to provide a range of services. Where the Indigenous Procurement Policy applies and there is an Indigenous supplier that can provide the services and represent value for money, they are engaged.

Since the establishment of the NIAA on 1 July 2019, the NIAA has procured services from Indigenous businesses in the following sectors:

- Management and Business Professionals and Administrative Services
- Education and Training Services
- Politics and Civic Affairs Services
- Building and Facility Construction and Maintenance Services
- Editorial and Design and Graphic and Fine Art Services
- Farming and Fishing and Forestry and Wildlife Contracting Services
- Defense and Law Enforcement and Security and Safety Equipment and Supplies
- Healthcare Services
- Travel and Food and Lodging and Entertainment Services
- Financial and Insurance Services
- Power Generation and Distribution Machinery and Accessories
- Engineering and Research and Technology Based Services

Member: Leeser

Question reference number: 0012

Type of question: Written

Date set by the committee for the return of answer: 02 August 2021

Number of pages: 1

Question:

What do the Indigenous companies offer you that non-Indigenous companies are not offering you, other than the ticking-a-box exercise of meeting the procurement policy? What's the substantial difference, if any? Are they doing different roles to other companies?

Answer:

The primary purpose of the Indigenous Procurement Policy is to stimulate Indigenous entrepreneurship, business and economic development, providing Indigenous Australians with more opportunities to participate in the economy.

Indigenous companies have proven ability to deliver wide range of high quality and value for money services and are generally engaged by the National Indigenous Australians Agency (NIAA) to provide the same types of services as non-Indigenous companies.

In some circumstances, the NIAA also engages Indigenous companies to provide specialised services. Indigenous businesses bring a unique cultural perspective and experience, an example of which is through the delivery of culturally safe, trauma informed services. This perspective is important for NIAA staff and stakeholders.

Type of question: Written

Date set by the committee for the return of answer: 02 August 2021

Number of pages: 1

Question:

Before the IPP came about, there were other people providing you with these services. Are you actually replacing with Indigenous businesses the businesses that used to provide you with services, or are you effectively joint venturing with old businesses that used to give you services that have an Indigenous partner on top?

Answer:

The National Indigenous Australians Agency (NIAA) has been subject to the Indigenous Procurement Process (IPP) since its establishment on 1 July 2019. The same value for money consideration is undertaken for both Indigenous and non-Indigenous Businesses.

Supply Nation is the Commonwealth funded Indigenous Business Direct service. Supply Nation registered businesses meet all requirements of an Indigenous Business under the IPP.

Member: Leaser

Question reference number: 0014

Type of question: Written

Date set by the committee for the return of answer: 02 August 2021

Number of pages: 1

Question:

To what extent are you looking at whether the businesses are actually genuine Indigenous businesses so that there's no 'black cladding'?

Answer:

The National Indigenous Australians Agency (NIAA) is responsible for the whole of Commonwealth Indigenous Procurement Policy (IPP) which applies to all non-corporate Commonwealth entities subject to Commonwealth Procurement Rules. Under the IPP, Supply Nation is engaged to identify Indigenous suppliers on behalf of the Commonwealth. Supply Nation has a five step verification process when registering and/or certifying Indigenous suppliers. Further information can be found on the Supply Nation website for more information.

Prime Minister and Cabinet Portfolio

Department/Agency: National Indigenous Australians Agency

Topic: Indigenous Procurement Program – Staffing Breakdown

Member: Leeson

Question reference number: 0015

Type of question: Written

Date set by the committee for the return of answer: 02 August 2021

Number of pages: 1

Question:

How many of your staff are Indigenous, as of your most recent figure?

What roles do they perform? Are there concentrations of Aboriginal and Torres Strait Islander workers in particular areas of the department? What is the spread like?

What is the retention rate for your Aboriginal and Torres Strait Islander workforce and how does it compare to the overall retention rate?

Answer:

- As at the 30 June 2021, the National Indigenous Australians Agency (NIAA) employed 293 staff who identify as Aboriginal and/or Torres Strait Islander employees. This represents 22.8 percentage of the workforce of 1,285 employees.
- Indigenous staff are engaged in a wide variety of roles and classification levels across the NIAA. Indigenous staff represent 30 per cent of the Agency's APS staff, 15.7 per cent of Executive Level staff and 28.3 per cent of the Agency's Senior Executive Service. Approximately 30 per cent of Indigenous staff work in the Australian Capital Territory with the remaining 70 per cent working in capital city, regional or remote locations.
- However, the separation rate for Indigenous employees is 12 per cent which is lower than the separation rate for non-Indigenous staff of 14 per cent¹.

¹ The NIAA does not calculate retention rates. This is the separation rate, calculated as the total number of ongoing employee separations in a 12-month period divided by the average number of ongoing employees over the same period.

Topic: Indigenous Procurement Policy – Analysis across the Commonwealth Public Service

Member: Leaser

Question reference number: 0024

Type of question: Hansard page 29, 22 July 2021

Date set by the committee for the return of answer: 2 August 2021

Number of pages: 13

Question:

CHAIR: We've talked to, I think, about half a dozen departments that we regard as the big procurers, as it were. But have you done any analysis across the Commonwealth Public Service that you can share with us about the performance of agencies in relation to the Indigenous Procurement Policy?

Mr Bulman: Yes.

CHAIR: You can take that on notice, if you like. It would be useful for our report.

Mr Bulman: Yes, we'll take that on notice and provide a bit of an annual breakdown of performance.

Unidentified speaker: And the industry?

Mr Bulman: And the industry as well.

Answer:

Tables A and B below show Indigenous Procurement Policy outcomes (number and value of procurement contracts with Indigenous businesses) for current portfolios by number and value for each financial year since 1 July 2015.

The outcomes across each year have been adjusted for machinery of government changes with contracts assigned to the current portfolios that own the contract. This is necessary to get a coherent picture of outcomes for the current portfolios.

Tables C and D below show the number and value of procurement contracts with Indigenous businesses by industry sector.

Results are not available for 2020-21 as the data is still being finalised.

TABLE A: Volume of Commonwealth procurement spend (\$) with Indigenous businesses by portfolio

Standing Committee on Indigenous Affairs

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into pathways and participation opportunities for Indigenous Australians in employment and business

Prime Minister and Cabinet Portfolio

Department/Agency: National Indigenous Australians Agency

Topic: Export and Trade Markets – Working with DFAT

Member: Claydon

Question reference number: 0025

Type of question: Hansard page 33, 22 July 2021

Date set by the committee for the return of answer: 2 August 2021

Number of pages: 2

Question:

Ms CLAYDON: It sounded to me like there'd been quite a bit of work done with Foreign Affairs and others.

Are we not a little bit more advanced than that? There are hubs just figuring out what they're doing?

Mr Bulman: I think Ms Persson was talking about our role within that. Absolutely, Foreign Affairs and Trade have had this front and centre of their mind and are driving it through, including with their Indigenous ambassadors et cetera. So it's an important part of the Commonwealth policy. We've got a role on that supply side, making sure that, as the Department of Foreign Affairs and trade link them into international business and do those deals, we're backing them in on this side so they can develop, build their capability and be ready to perform. What we can do if it's useful is take on notice to put together a little bit of a blurb about how we work with DFAT, our colleagues, and some of the approaches they are taking as well as ourselves. You'll find it's been quite a long journey over the last four or five years working with them on these things.

Ms CLAYDON: Thank you. It would be good to have a sense of just how far down that path we are. There are a lot of good international examples, so I'm interested to know whether we are playing catch-up and how we're going on that. Thank you.

Answer:

In relation to supporting Indigenous entrepreneurs access international markets, the National Indigenous Australian's Agency (NIAA) has supported activities to help businesses access international networks and peer to peer capability development. NIAA has particularly focused on Canadian and New Zealand markets. For example, NIAA supported the participation of Indigenous business delegations in the World Indigenous Business Forums in New Zealand in 2018 and Canada in 2019.

Additionally, with financial support from NIAA, the Australia New Zealand Leadership Forum's Indigenous Business Groups held the inaugural Virtual Indigenous Trade and Connections Fair in February 2021. This event showcased both Indigenous and Maori businesses.

These activities have aligned closely with the work of the Department of Foreign Affairs and Trade (DFAT) and Austrade. For example, NIAA provided auxiliary support to Austrade, who led an Indigenous trade mission to Canada in 2019.

NIAA also works closely with DFAT to progress Indigenous economic interests in international fora. For example, NIAA has partnered with DFAT to fund the Export Council of Australia and Australia's new Indigenous Network on Investment, Trade and Export (IgNITE) to run an export training, business matching and mentorship project through Asia-Pacific Economic Cooperation (APEC) called 'Growing Indigenous Business in APEC through Trade.'

Much of NIAA's future work with DFAT will likely be guided by their recently launched Indigenous Diplomacy Agenda, which seeks to grow the Australian and global economy through the promotion of Indigenous commerce and investment, among other things. DFAT works closely with both NIAA and IgNITE to consider Indigenous interests in free trade negotiations and to promote the export-readiness of the Indigenous Australian business sector. Further information about DFAT's Indigenous Diplomacy Agenda is at <https://www.dfat.gov.au/publications/indigenous-diplomacy-agenda>.

Inquiry into Pathways and Participation Opportunities for Indigenous Australians in Employment and Business

Prime Minister and Cabinet Portfolio

Department/Agency: National Indigenous Australians Agency

Topic: Housing Construction in Remote Communities

Member: Leaser

Question reference number: 0026

Type of question: Hansard pages 36-37, 22 July 2021

Date set by the committee for the return of answer: 2 August 2021

Number of pages: 2

Question:

CHAIR: I want to move to housing construction in remote communities. To what extent, when you're awarding contracts to do housing in remote communities, is there a training component to upskill local people so they're able to undertake maintenance and ongoing work after those constructions are completed?

Mr Bulman: The way the Commonwealth deals with housing in remote communities is by providing funding to the jurisdictions, under a national partnership agreement. We currently have one with the government of the Northern Territory, where the level of need is so incredibly high compared to the other jurisdictions. In that agreement, we set a 40 per cent employment target—someone's going to text me if I got that number wrong—and are working, then, through the government to make sure that they report against that, including skills training et cetera. The other is making sure there's a pipeline—

CHAIR: What can you tell us about the results of those reports that you've had back from the Territory and other places?

Mr Bulman: To date they've been meeting their milestones on employment. The other way to think about it is that, over the last 10 years, we've had a partnership agreement with all the jurisdictions, and this is the first time that we've set a very large employment target and possibly, in the Commonwealth, an employment target for Indigenous Australians at all. We set a 20 per cent target there over the 10 years, and that was constantly exceeded. The level of training and employment that came out of that was really quite remarkable. It was building on that where we built the Northern Territory agreement—and I will confirm that it's 40 per cent, and I'm just looking for the data on outcomes.

CHAIR: Do you want to come back to us with the inputs into those agreements but also how the outcomes have gone there, too?

Mr Bulman: Yes, absolutely. I will.

Answer:

The National Partnership Agreement for Remote Indigenous Housing (NPARIH) and the National Partnership for Remote Housing (NPRH) provided a \$5.4 billion Commonwealth investment over ten years (2008-2018), delivering 4,000 new houses and 7,500 refurbishments across 300 Indigenous communities.

As detailed in the 2017 Remote Housing review of the NPARIH and the NPRH, rates of overcrowding fell from 52.1 per cent in 2008 to 41.3 per cent in 2014-15, and projected to fall to seven per cent by 2018. Between 2008 and 2016, jurisdictions consistently met or exceeded 20 per cent local Indigenous employment on new housing construction. For example, the Northern Territory (NT) Government had a target of 20 per cent for capital works, property, tenancy and management and 40 per cent for repairs and maintenance. To support these targets, the NT Government introduced a program to support long-term employment and training through longer contracts and a larger service footprint – over 2,000 Aboriginal Territorians were employed through the strategy.

The Commonwealth is investing \$550 million, matched by the NT Government to create a \$1.1 billion National Partnership Agreement for Remote Housing Northern Territory (2018-2023) to help address overcrowding and improve housing conditions in 73 remote NT communities and the Alice Springs town camps.

The National Partnership investment is to deliver 1,950 bedrooms, equivalent to 650 three-bedroom houses, and contribute to property and tenancy management services. The National Partnership aims to ensure, to the maximum extent possible, works are delivered by local Indigenous Territorians and businesses. To support the achievement of this outcome, an annual Aboriginal employment target of 40 per cent of the workforce involved in capital works and property and tenancy management is required, which increases by 2 per cent per financial year. Under the National Partnership to 31 December 2020, the NT Government has reported exceeding this target.

Inquiry into Pathways and Participation Opportunities for Indigenous Australians in Employment and Business

Prime Minister and Cabinet Portfolio

Department/Agency: National Indigenous Australians Agency

Topic: Scholarships Program for Young Australians

Member: Snowdon

Question reference number: 0027

Type of question: Hansard page 39, 22 July 2021

Date set by the committee for the return of answer: 2 August 2021

Number of pages: 1

Question:

Mr SNOWDON: I'm very conscious of the time. I wouldn't mind just asking one question relating to VET. In your submission, at paragraph 3.3.1, you talk about the recommendations from the Expert Review of Australia's VET System. You go to the recommendations and then you talk about the government investing \$585 million. Then at a dot point, in relation to the Scholarships Program for Young Australians, you say:

Priority will be given to applications from selected cohorts, including in ten identified regional areas ...

What are those 10 identified regional areas and how were they identified?

Mr Bulman: Our colleagues in the department of employment are administering that young Australians program. What we did with this submission was make sure that we had input from all the relevant departments. I don't have the regions in my folder. You may see in the footnote that there's a link. From memory, when we were working with them, it lists those regions. We're happy to take that one on notice and send you the regional areas.

Mr SNOWDON: And what's the rationale?

Mr Bulman: Sorry?

Mr SNOWDON: What's the rationale for selecting those particular regional areas?

Mr Bulman: We'll pass that question through to our colleagues in the department of employment.

Answer:

Response provided by the Department of Education, Skills and Employment (DESE).

The 10 regional areas are Gosford, Grafton (NSW), Maryborough, Townsville (QLD), Alice Springs (NT), Wanneroo, Armadale (WA), Port Pirie (SA), Shepparton (VIC) and Burnie (TAS). The 10 locations were announced on 14 April 2019.

The process of selecting the locations was informed by high youth unemployment rates in regions across Australia using the 2016 ABS Census and the results in the 2017 Productivity Commission Report (PC report) *Transitioning Regional Economies*, which identifies regions facing significant challenges in successfully transitioning to a more sustainable economic base.

The youth employment “hot spots” listed in the Brotherhood of St Laurence (BSL) *Smashing the Avocado Debate: Australia’s Youth Unemployment Hotspots* report were also considered.

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Pathways and Participation Opportunities for Indigenous Australians in Employment and Business

Prime Minister and Cabinet Portfolio

Department/Agency: National Indigenous Australians Agency

Topic: Community Advisory Boards

Member: Snowdon

Question reference number: 0028

Type of question: Hansard pages 37-38, 22 July 2021

Date set by the committee for the return of answer: 2 August 2021

Number of pages: 2

Question:

Mr SNOWDON: If you wouldn't mind, I'd like you to take us through the community advisory boards—where they've been set up and how they're working—and if there's been any feedback or evaluation of their roles.

Ms Elliott: As you rightly said the community advisory boards were one of the key reforms that were introduced in 2019, engaging with those service providers to not just look at establishing new community advisory boards as an additional mechanism but also look at existing community engagement mechanisms that might already be in place in communities and make sure they're engaging with them effectively, as part of identifying opportunities for jobseekers to participate in activities that meet the needs and aspirations of remote communities. We've been monitoring it through a provider performance review process.

We've been gathering information about how service providers are engaging with communities and making sure that it is genuine engagement. Community advisory boards are just one aspect of that; there are a range of different forums that our service providers will engage with, whether it's with groups of jobseekers and community members or through more formal arrangements. As you would have seen in the response to the question on notice from the last hearing, we are about to commence a bit of a stocktake, so we can't give you the specific numbers of advisory boards that have been established. We're just about to go out and do a bit of a stocktake to see how they're tracking.

Mr SNOWDON: Would you mind giving us a scenario of what one might look like, what its functions might be and what role it might have?

Ms Elliott: We gave a couple of examples in the response to the question on notice, but we can provide a bit more detail. It was quite brief.

Mr SNOWDON: That would be very useful.

Answer:

Further to the response to Question on Notice 0003, the National Indigenous Australians Agency (NIAA) requires Community Development Program (CDP) providers to establish a Community Advisory Board (CAB) where there is not another suitable community engagement mechanism in place.

The CAB or existing community engagement mechanism should include representatives from across the community and provide regular advice to CDP Providers on CDP services and activities. This can include advice on cultural matters, opportunities for economic development and suggestions for new activities and projects that reflect the needs of community members. Community engagement is monitored within CDP Provider Performance Reviews.

As the needs and circumstances of communities in each region are very different, approaches to community engagement will differ from community to community and between CDP regions. In some areas it may be more appropriate for CDP providers to work with pre-existing community engagement structures rather than establishing a CAB.

Examples of current community engagement mechanisms are provided in response to Question on Notice 0003.
