Subject: REJECT Facial recognition LEGISLATION

Hi Committee Secretary,

I wish to write to you today as an Australian citizen with local government experience.

That I do not support national facial recognition - as it's one step closer to the Orwellian nightmare.

Also an eventual progression to a social credit score system. People will be up in arms. I will be up in arms. I refuse to lose my freedoms with constant surveillance at every little thing the government decides that I may or may not be doing wrong.

Thank you
Zac Ford
