

Telecommunications and Other Legislation Amendment (Assistance and Access) Bill 2018

For the record, I oppose this bill because I do not want to see Australia turned into a fascist police-state.

People should have the right in a democracy to the fundamental rights, as FDR advocated; to freedom of speech, freedom of thought, freedom from want, freedom of political expression and freedom of religion. A democracy also must uphold the human rights values to the presumption of innocence and everyone must be given a fair trial.

International terrorism is state sponsored but the best way to end terrorism is to develop because development builds peace. Poverty breeds disease and terrorism.

Sincerely,

Jan Pukallus
