### ANSWERS TO QUESTIONS ON NOTICE

**Agency:** Australian Taxation Office  
**Topic:** PRRT data

**Question:**

**Ms Saint:** That is a different set of data. That's where we publish entity-level data, qualifying entities that come within that population. This other data is aggregated data that we publish on key areas of tax. Relevant to what we're talking about today, PRRT data is included in there. It includes things like what PRRT has been collected and carried forward, expenditure et cetera. We're happy to provide that link to you.

**Senator PATRICK:** Yes, that would be helpful. I do note that that tax transparency data does include 'by entity' once they're triggered into the transparency regime—PRRT as well, for each entity. That is included in that data.

**Ms Saint:** That is correct.

**Answer:**

PRRT data, including PRRT collected and carried forward, is publicly available on [data.gov.au](https://data.gov.au).
