

To whom it may concern,

I am writing the letter to oppose the Migration Capping Bill.

In my deep mind I always thought Australia is a wonderful country with freedom living environment which allows people could talk what they thinking and actually walk on it. It is the main reason why I choose Australia to study, work and hope to live in the country for rest of my whole life.

I already worked for the country for 2 years and contributed tax for the country. In addition, I even bought a house for my family for long-term living. However, all above is based on I believe I match the current requirements of Australia Immigration Office and after years waiting I will actually get PR. However, if the Migration Capping Bill becomes real legislation, everything is changed, all plans or dreams of my will be killed. Although, Australia has the right to approve the bill, you still need thinking current international students, foreign workers, temporary visa holders and PR pending. They already given their huge contribution to the county because they believe Australia is their next home. The result after the bill becomes legislation is that Australia nation reputation will be destroyed due to your misleading.

Therefore, please refuse the bill and walk on what your previous talk for these people who trust you, trust Australia.
