Subject: Nuclear Waste Dump at Muckaty Station NT
Date: Thursday, 4 March 2010 9:06:25 PM

To the members of the Senate Enquiry Committee

I would like to register my objections of the positioning of a nuclear waste dump in the NT at Muckaty Station. The reasons for my objections are that no other site has been considered that is nearer to the production of nuclear waste. The more handling and transferring of waste over long distances the higher the chance of a "nuclear accident". Waste transfer is subject to human failings and the NT site will maximise this danger. Nuclear waste should be move as little as possible.
