Submission to Senate Economic Legislation Committee
Australian Renewable Energy Agency (ARENA) - Review.

economics.sen@aph.gov.au

I believe that sooner or later as we experience worse droughts, floods, heat waves, bushfires and ocean acidification, our people will demand effective action to reduce our carbon emissions.

Ongoing research on renewable energy at an industrial scale, funded in partnership with ARENA, is essential for Australia to be well prepared with appropriate technology to supply our future energy needs. We learn by doing.

I am concerned for my children, grandchildren and further generations of Australians.

Robin Friday
