

hi my name is \_\_\_\_\_ 19 month ago I had a brain anurysum sub racnoid  
hemarage.

5 months after I had bike accident attempted suicide since anyrisum I was  
addicted to painkillers cannabis has helped me give up pain killers and  
mellowed my tendencies to kill myself it also helps with controlling pain in my  
head and left foot as it was crushed in bike crash . If it wasn't for the cannabis  
I would be addicted to pain killers for the rest of my life and stops the  
depression caused by brain bleed I think that the government should make  
MM available to people who need it . I have no licence due to deformetys in  
my vision after anyrium

thank you
