ABC

The ABC is getting too commercial and I am not happy about it because it is supposed to be an alternative to commercial TV.

The trashing of the new inventors "what are you thinking" A show that promotes innovative new inventions by Australians for Australians and possibly the rest of the world, is just dumb. We maybe the lucky country but slowly and surely we are becoming the dumb country.

Also the axing of the arts show is crazy. The powers that be are not willing to give alternative voices a say, but are happy to feed us mass produced, easily digestible junk. I'm unsure what the powers the be actually gain in following this agenda. But wake up ABC before it's too late.
