

To the Senate Committee:

This proposal frightens me.

A minority group should not have so much say. This is an attack on the family.

True parents are a Husband and a Wife which has been so since the beginning of civilisation.

Every child should have a mother and a father.

Researching this Bill I found that there are more problems than it resolves and the United Nations clearly overrides your argument.

I suggest those involved in this dangerous amendment, spend their time in governing Australia which is expected of those elected by the Australian Citizens.

Thankyou for this opportunity to respond in opposition to this Proposal.

Yours sincerely

Fran Taylor
