

Submission to the Senate Legal and Constitutional Affairs Legislation Committee, into the TPP-11 implementing legislation (the two Customs Bills introduced into the House of Representatives on August 23).

The government treats very brutally the most vulnerable people, people seeking asylum on boats, insisting 'we will decide who comes to this country', but is a pussycat towards international corporations, enthusiastically handing over our courts' authority to foreign corporate lawyers who arbitrate on any of our sovereign rights corporations wish to trample.

How deranged is that! ISDS was a bridge too far for John Howard.

Yours sincerely,
Jim Morris
