

**RACP response to the Select Committee's questions on notice:**

**QoN 013-02**

**Do you or has your organisation ever received direct or indirect support from the Pharmaceutical industry, including travel, attendance at conference, or events sponsorships, including from manufacturers of Nicotine replacement therapies?**

RACP accepts pharmaceutical company sponsorship with strict limitations (all proposals are handled as High Risk and do not influence the College's policy positions). All pharmaceutical companies we engage with must certify they strictly adopt the Medicines Australia Code of Conduct for their sponsorship and in their actions.
