

I wish to inquire as to the continuation of the Green loan scheme and the problems of the existing assessments, which have been completed, cannot be submitted and the non-payment for work done.

Our son has been one of the approved assessors. He currently has about 16 assessments that he advises he cannot submit, as the portal through which these are to be sent is not operating. Apart from his financial problem, I am curious about the reaction of the clients he has assessed, presuming that they may have paid for the assessment.

He advises that he is now allowed to do 5 assessments a week. This seems to me to be rather futile, as he cannot be paid for the ones he has completed and the client assessments cannot be submitted. He is also reluctant to do any more if he is not going to be paid.

I understand that the \$10,000.00 interest free loan scheme has been stopped, but I am sure that the completed assessments must somehow be able to be submitted and the fee paid
