

I give my full support to the 10c refund on bottles campaign being passed.

Not only is it common sense from an environmental point of view, it helps minors in those impressionable early development years the importance of working for a dollar rather than today's hand out approach. In my childhood much fun was had hunting for those bottles with my friends which in turn supplied an abundance of happy times as well as my weekly allowance. Bring back the standards to yesteryear and pass this win win bill!

Thank you for your attention.

Yours faithfully

ANNE HARDING
