

"From hell on earth"

Duplication and translation of a handwritten letter of WT-victims from Ostfriesland, Lower Saxony, Germany

Mr.
Thomas Jacob
(Address)
(Initiator of the Berlin rally 2010)

12.05.2010

Dear Mr. Jacob!

Due to your call on the internet, where you accost concerned citizens in close proximity to wind turbines, I would like to describe briefly my and our symptoms respectively.

With the erection of the bigger wind turbines here at the coast of the North Sea, I'm suffering respectively some members of my family are suffering from diverse symptoms like hypertension, dizziness, headache and insomnia or rather deprivation of sleep, which is extreme for me and one of my relatives because we can "hear" the infrasonic as a vibration of our bodies.

We have one or more bass tones, 24 hours a day, which can't be absorbed with anything - really anything! Also the whole body vibrates like on a ship at stormy sea.

Only the hope the authorities must make out this extreme problem after all, let us still live on!!! It is a trip to hell!!!

Our appeal to the authorities: Immediate overnight shutdown of all wind turbines, infrasonic measurements in dwellings, also in houses which are far-off from windfarms.

With pleasure I would have taken part in the demo personally but my current state of health (WTS) does not admit it anymore!

In hope that, nevertheless, everything turns to good I remain with the best wishes for all of us

an inhabitant of the North Sea coast
respectively from hell on earth!!!

(The person would like to remain unnamed because of fear of backlash.
The name is known to Mr. Jacob and us.)

(Translation Marco Bernardi)
