
Submission,

As a citizen of this country and a taxpayer I strongly support the bill that aims to remove Medicare funding for gender-selection abortions. I strongly believe that our tax dollars should NOT go to killing unborn babies at all - and especially because he or she is not a preferred gender. Medicare funding should cover genuine medical issues. Killing unborn babies is not a genuine medical issue.

Human life begins at conception. It is a statement of science. It is not a religious, political, faith or ideological statement. It is a statement based on observation, on research and on facts. I would like to invite any politician to read the White Paper of Dr. Maureen L. Condic, "When Does Human Life Begin?"

URL: http://www.westchesterinstitute.net/images/wi_whitepaper_life_print.pdf

We all began from the one cell. Politicians too. That one cell was not a potential human being but a human being with potentials. From the moment of conception we had our own DNA and our system was not a woman's (our mothers') body any longer. It was a separate body, a separate human being whether a boy or a girl. And when the world speaks so much of women's role in society, why not prevent the tax-payer funded slaughter of girls in mother's wombs.

I am appealing to anyone who is going to read this submission - to his/her reason, will, feelings - whatever constitutes that person as a human being: please consider the consequences of gender-selection abortions, please consider the consequences of any abortion which can only be described as criminal, barbaric and an act of madness.

Stanislaw Parol
