## Detention Population

**Question:** A list of all locations that have been designated places of detention being used by the Department for the purpose of accommodating IMAs since November 2007, including:

- i) the date at which each centre commenced operations;
- ii) the capital and fit-out cost prior to occupancy;
- iii) the accommodation capacity of each centre, and any subsequent change to that capacity, and the relevant dates to which that change in capacity applied
- iv) A break down of accommodation capacity, and any changes to that capacity, including the relevant dates for those changes as follows:
  - (1) single room accommodation for single persons,
  - (2) shared room accommodation for single persons,
  - (3) shared accommodation for families,
  - (4) dormitory room accommodation for single persons in permanent or demountable buildings,
  - (5) dormitory room accommodation in marquees for single persons,
  - (6) other (please specify);

**Answer:**

- i) The table below provides details of all facilities used to accommodate Irregular Maritime Arrivals (IMAs) since November 2007, including the date IMAs were first accommodated there.

\* Some of the facilities used to accommodate Irregular Maritime Arrivals since November 2007 were operational well before that date (e.g. Villawood IDC was established in Sydney in 1976). Therefore, in the above table, "date facility commenced operations" means the date Irregular Maritime Arrivals were first accommodated in this facility since November 2007.

# The Alternative Places of Detention listed in the above table do not include hospital accommodation used for medical treatment, schools used to educate school-aged children and short-term accommodation used to house Irregular Maritime Arrivals in exceptional circumstances (e.g. overnight hotel accommodation used during transfer between facilities where flight schedules have changed).

\*\* Virginia Palms was used to accommodate a small number of IMAs from 15 March 2010 however full operation of the facility did not commence until 17 September 2010

Figure 2

The following pie chart shows that as at 22 August 2008 there were 217 people (about 77 per cent of the total immigration detention population) who had arrived in Australia lawfully and were then taken into immigration detention for either overstaying their visa or breaching their visa conditions, resulting in a visa cancellation. The number of people in immigration detention who had arrived unlawfully by air or boat as at 22 August 2008 was 47, representing about 17 per cent of the total immigration detention population.

Figure 3

The following pie chart shows that as at 22 August 2008 there were 129 people who had not applied for a protection visa while in immigration detention and 88 people who had their protection visa application refused. A further 34 were seeking a merits-based or judicial review of a negative decision on their initial application for a protection visa or on an application remitted for decision by the RRT or the courts, and 32 were awaiting a decision from the Department on their protection visa application. These 32 had applied for protection after having been taken into immigration detention. This compares with some 2,100 people who in recent years have applied for protection while living in the community and who remain lawfully in the community on a bridging visa as they await a decision on their visa application.

## DETENTION STATISTICS SUMMARY

*Detention and Offshore Services Division, DIAC - As at 29 February 2008*

As at 29 February 2008, there were 475 people in immigration detention, including 44 in community detention. Of these 475 people, 21 were illegal foreign fishers (IFFs); 16 illegal foreign fishers were in the Northern Immigration Detention Centre, four were in prison serving custodial sentences, and one illegal foreign fisher minor was accommodated in a private apartment. Most of the IFFs remain in immigration detention for only a short period of time, pending their removal from Australia.

Of the 475 people in immigration detention, 7 were unauthorised boat arrivals and 46 were unauthorised air arrivals.

There were 33 ships' crew who arrived without a valid visa and were restricted on board (a form of immigration detention) while their vessel is in port.

In immigration detention 80 people are seeking asylum or a merits or judicial review of a decision in relation to their application for a protection visa. Of these, 20 people were waiting for DIAC to decide a protection visa application outcome. The majority of asylum seekers arrive in Australia with a valid visa and live in the community while they pursue their claims.

## **Detention Population**

**Question:** The average square metre allocation for each detainee, and how has that figure changed over time since November 2007;

**Answer:** Detention standards for design and fit out of Immigration Detention facilities were introduced in October 2007.

The requirements for Immigration Detention Centres are 10 square metres for single occupancy, 15 square metres when shared and a maximum of 2 per bedroom where unrelated (unless culturally desirable to form larger groups).

For Immigration Transit Accommodation, the square metre allocation is 10 square metres for a single bedroom, able to accommodate two as a contingency.

These standards have not changed since their implementation in October 2007.

## Detention Centre Plans and Facilities

**Question:**

Provide a complete breakdown of staff by occupation/role, engaged to perform functions in each of the Immigration Detention Centres including:

- a) How many SERCO staff are currently employed at each detention centre?
- b) How many DIAC staff are currently located at each detention centre?
- c) How many IHMS staff are currently located at each detention centre?
- d) How many contractors provide services on site at each detention centre over a six month period?

**Answer:**

- a) Serco has provided the following answer in response to part (a) of this question:

*Serco management continuously reviews and, as necessary, amends staffing arrangements at all sites in the national immigration detention network to ensure that staffing levels are appropriate and sufficient to allow Serco to meet its performance obligations under the Contract. The levels of staffing at any particular site therefore vary from time to time depending a number of factors including on the number and needs of the clients accommodated at that site at any particular time.*

*There are operational and security sensitivities around disclosing precise numbers of Serco staff at a particular site in the detention centre network. Accordingly, Serco and DIAC have agreed that information regarding specific staffing levels is confidential to Serco and contractual protections are accorded to this information (Schedule 10 of the Detention Services Contract).*

DIAC comment: The department recognises that the provision of this information is an issue for the Committee. The Secretary wrote to the Committee Secretary on 5 August 2011 seeking the Committee's views on requests for sensitive information to be heard in camera.

- b) Please see the table below, which shows the number of DIAC staff at each detention facility as at 30 June 2011.
- c) The department's contracted health services provider, International Health and Medical Services (IHMS), has provided the attached tables, which show staffing levels at each detention facility as at 30 June 2011.
- d) The total number of all contractors at immigration detention facilities, either directly contracted by the department or indirectly subcontracted through Serco or another primary contractor, will vary between any six month period of time. The department does not keep figures on the number of contractors at each site.

## **Detention Centre Plans and Facilities**

**Question:** What has been the cost – departmental and administered - of running each detention facility broken down for the past three financial years. Please provide a summary of operational expenses for each year?

**Answer:** The operating costs of running each detention facility for the past three years are summarised in the attached table.

\* The \$m columns represents the total operational expenses for each financial year.

\*\* Please note that some charges are across the network and can not be attributed to a specific centre.

\*\*\* Excluded community detention and capital costs

### **Detention Centre Plans and Facilities**

**Question:** Please advise what medical assistance, including mental health service assistance, is available to detainees at each detention centre.

**Answer:** Access to health and mental health care is at a standard comparable to that available to the broader community.

People in immigration detention have access to health clinics at all immigration detention facilities and, where clinically indicated, are also referred to community-based allied health service providers, specialists or hospitals for further treatment.

Services provided are consistent across the immigration detention network and include the following, either provided on site or via community-based service providers:

- General Practitioner consultations;
- Nurse consultations;
- Mental Health counselling;
- Psychological counselling;
- Dental services;
- Optical services;
- Torture and trauma counselling;
- Specialist psychiatric services; and
- Other medical specialists and allied health services as clinically required

## Detention Centre Plans and Facilities

**Question:** How many mental health professionals are engaged permanently or temporarily at detention facilities on the mainland? Please provide details of the services that they provide.

**Answer:** The department requested this information from the contracted health service provider, International Health and Medical Services (IHMS), and the following table was provided in response.

This states that as at 30 June 2011, there were 75.5 full time equivalent mental health professionals engaged at mainland immigration detention facilities, distributed as follows.

## **Contracts**

**Question:** Is there a mandated staff ratio for detention centres and other facilities where asylum seekers are detained? Is that ratio currently being met? If not, at which facilities is it not been met?

**Answer:** No, there is not a mandated staff ratio for immigration detention centres and other facilities. As per clause 3.2 of the immigration detention centre contract (the contract), the department relies on the skill and expertise of the service provider. As such Serco must ensure that the personnel levels at facilities are adequate to deliver the services in accordance with the contract.

The department ensures that Serco's performance is rigorously monitored at all its sites. Serco is subject to monthly performance reviews and it is subject to penalties or sanctions where it does not meet the standards set out in the contract. The abatement process is integral to the department in achieving value for money in the performance of the detention services.

## **Detention Centre Plans and Facilities**

**Question:** What is the cost per day, per detainee, in each of the detention centres on the mainland and on Christmas Island?

**Answer:** The Department's mainland immigration detention network consists of a range of facilities of differing structure, location and capacity. Costs are not captured on a per person per day basis as each facility has different cost drivers where costs fluctuate depending on the number of people in that facility and the services that each individual person might require.

The ongoing operating costs in respect of Irregular Maritime Arrivals are regularly reviewed in conjunction with the Department of Finance and Deregulation.

## Detention Centre Plans and Facilities

**Question:** What is the number of staff currently working on case management at each centre?

**Answer:** The numbers of staff in the table below relate to staff working in case management roles at Immigration Detention Facilities and with community clients, including those in Community Detention, as at 30 June 2011. The figures include Case Managers and those supporting case management services.

Location	Case Management Full Time Equivalent as at 30/06/2011

<b>Sub-total</b>	<b>61.7</b>
<b>TOTAL</b>	<b>203.7</b>

<sup>1</sup> Case management staff at Villawood also case manage clients in NSW and ACT correctional facilities.

<sup>2</sup> Additional case management resources for clients at the Melbourne ITA are provided through offsite arrangements by staff in Victoria Case Management based at the Melbourne CBD office (see below).

<sup>3</sup> These teams provide case management services to IMA clients in Community Detention, non-IMA clients in the community and may also provide case management services to centres in metropolitan areas and correctional facilities through offsite arrangements.

The number of case management staff at each centre is based primarily on client numbers at each centre and consideration of the work required in case managing each client based on their individual circumstances. However, in some cases case managers are not physically located at individual centres due to local service delivery arrangements or the availability of office infrastructure and/or personal accommodation at each location.

Please note that the staffing numbers above do not include staff undertaking training and mentoring at state offices on 30 June 2011 prior to deploying to remote locations as Case Managers.

<b>TOTAL</b>	<b>553.10</b>	<b>75.65</b>	<b>628.75</b>	

\*Please note that some expenses apply across the network and can not be attributed to a specific centre. Some costs, which in previous years could not be directly attributed to a specific centre, have been allocated for budget purposes.

The estimate of operational expenditure includes the cost of services provided by the detention services provider, the health services provider, IAAAS providers, Life Without Barriers and the Australian Red Cross. It also includes the cost of interpreting services, air charters and other travel, utilities, repairs and maintenance, IT and communication costs, education services for IMAs and other miscellaneous costs. The costs include estimates for DIAC staff directly involved in the management of the centres.

These estimates exclude any capital or costs associated with the community detention program. It is important to note that the above estimates could vary depending on dynamic factors such as the number of clients at a facility during the year, the mix of the client caseload in a facility, specific client needs, processing times and any change to operational requirements that may be necessary.

## Detention Centre Plans and Facilities

### **Question 20:**

Please provide a full list of all sites investigated by the Department over the past three financial years as suitable or potentially sites or facilities for asylum seeker accommodation?

### **Answer:**

The Department has received offers or approaches from a number of individuals and organisations identifying potential sites across Australia. Primarily, the Department works closely with the Department of Defence and the Department of Finance and Deregulation's Commonwealth Land Register to identify available Commonwealth property.

The Department investigated the following sites or facilities for accommodation, which then proceeded:

Leonora, Western Australia;

Darwin Airport Lodge in Darwin, Northern Territory;

Asti Hotel in Darwin, Northern Territory (now closed);

Scherger RAAF Base, Queensland;

Virginia Palms Hotel, Queensland (now closed);

Wickham Point, Northern Territory;

Northam Training Camp, Western Australia (also known as Yongah Hill);

Inverbrackie Defence Housing, South Australia;

Pontville, Tasmania;

Gwalia Lodge at Leonora, Western Australia;

Berrimah House at Darwin, Northern Territory;

Jandakot, Western Australia; and

Broadmeadows, adjacent to the existing Immigration Transit Accommodation facility, in Melbourne, Victoria (contingency).

## JOINT SELECT COMMITTEE ON AUSTRALIA'S IMMIGRATION DETENTION NETWORK

\*Q21\*

**Question:** Please provide copies of:

- a) all Incident Reports received by DIAC from SERCO since 1 January 2008.
- b) all Incident Reports received by DIAC from IHMS since 1 January 2008.

**Answer:** a) According to departmental records, the Department of Immigration and Citizenship (DIAC) received 9,157 incident reports from Serco over the period 1 October 2009 to 30 June 2011\*. Departmental records indicate that DIAC received 1,869 incident reports from G4S over the period 1 January 2008 to 31 January 2010#.

The department estimates that it would take a departmental officer approximately 919 hours of work (this is equivalent to around 25 weeks of work for a full time officer) to extract all reports from the system as each report needs to be extracted individually.

For this reason, the department has instead produced a summary table of all incident reports received from the detention service provider from 1 January 2008 to 30 June 2011. The table lists the following variables: incident number, incident type, incident level, date, location and who reported the incident.

It should also be noted that each of the individual incident reports contain personal identifier information on clients in detention. The Secretary has addressed this issue in his letter of 5 August 2011 to the Committee Secretariat.

# Source: Immigration Services Information System (ISIS) – Legacy system used to record information relating to persons detained in immigration detention facilities administered and operated by the former detention service provider, G4S.

**Note:** On 29 June 2009, DIAC entered into a five-year contract with Serco Australia Pty Ltd (Serco) to provide services at immigration facilities. Serco took responsibility for detention service provision through a staged approach beginning on Christmas Island on 1 October 2009. The transition from the previous detention service provider, G4S, to Serco was completed on 31 January 2010 when Serco took responsibility for managing all immigration detention facilities on Christmas Island and mainland Australia.

b) The requested Incident Reports contain personal identifier and medical information on clients in detention. The Secretary has addressed this issue in his letter of 5 August 2011 to the Committee Secretariat.

A copy of all IHMS Incident Reports for the period January 2010 to mid July 2011 have been retrieved. IHMS Incident Reports for the period January 2008 to December 2009 are not able to be retrieved in the timeframe given, because these incidents occurred prior to changes to the IHMS reporting system that enabled electronic recording and recall of incidents. Incident Reports prior to this were created manually and individually attached to each client record. Considerable resources would need to be deployed to manually retrieve these reports.

Incident Summary Report for ALL CENTRES from: 01/01/2008 to 30/06/2011				
Note: Under the G4S – ISIS records Incident “Types” are recorded against set categories, for example, “Accident”, “Media”, “Damage to facility”, etc. The Incident Type category “Escape from an immigration detention facility (includes mass escape)” covers all escapes regardless of the number of escapees, it should be noted that mass escapes have been rare in the detention network.

**IHMS**

A quarterly summary of IHMS incidents by category between January 2010 and June 2011 is attached. The department is unable to provide a quarterly summary of these Incident Reports by centre in the timeframe requested by the Committee.

IHMS Incident Report figures will include a high level of double counting where the incident covered more than one category.

IHMS Incident Reports for the period January 2008 to December 2009 are not able to be provided in the time frame given, because these incidents occurred prior to changes to the IHMS reporting system that enabled electronic recording and recall of incidents. Incident Reports prior to this were created manually and individually attached to each client record.
