

Please accept my submission to the Senate Inquiry- "Stronger Futures in the Northern Territory Bill 2011 and two related bills"

The core of my submission is that I am offended that I, a white Australian, and the Government that represents me, should unilaterally choose to tell Aboriginal people what should be important to them and how these so called important goals should be achieved.

Even if we white people did respect and understand Aboriginal people and their culture and legislated accordingly, nothing but disappointment, failure and on-going misery will be achieved if we determine the goals for First Australians.

Please reconsider this Bill.
