

Senate Standing Committee on Environment, Communications and the Arts

Dear Sir/Madam

I was become a Home Sustainability Assessor under the Home Sustainability Assessment Scheme (HSAS) as on 5th February 2010. I have been certified with the unique Assessor number of . On Monday, 8th February 2010 I have applied for a contract with the government to work as an assessor under the Green Loans program.

Would you please inform us on which criteria the department have been selecting the application? Because one of my friend who applied for the contract after me, have received the assessor ID.

I am facing many problems due to the uncertainty of the Green Loan Program. The program was highly promoted so that's why most of the people invested in it. I have also invested about \$3000.

I am quite hopeful from Minister Wong that she will sort out the issues associated with Green Loan Program. I believe that we have already discussed enough about this program, now it's time to solve the problems associated with this. It should be quickly to restore the confidence of assessors. Let's save the assessor from financial and mental frustration.

Yours sincerely,

Muhammad Asif
