

I would like to express my support for the windfarms in and around Portland, where I live. Although I do not live in close proximity to any of the windfarms, I have been contracted to complete environmental studies and some maintenance work at the Yambuk, Codrington, Cape Nelson and Cape Bridgewater windfarms, and over the past six years would estimate that I have spent approximately 2 days a week working directly under the towers. I have had no ill effects from this contact with the windfarms.

My family support the windfarms and the environmental impact they will have in the long term. I am happy to be contacted should you require any further information.

Regards,

Phillip King
