

Dear Sir/Madam,

I came here 2005 to Australia on Student visa. I did one year masters in business. I did diploma in cookery in reputation college (Billy Blue) which is run by Latrobe University. And I got many awards. I am applied for 485 visa in 2008. I got Job in reputation catering company called gastronomy. Because of my skills they give me full hours to work. Now I am in bridging visa. But they didn't give me full time offer because of my visa. So many companies were offered me Job's. But I don't have any Permanent Resident. Because of that, I missed so many opportunities. I got Bakery manager position in Coles Company. I helped them to improve the sales. And they want to give me best position. But I don't have any certain visa so that they are waiting for my visa. Now I heard about "capping and cease" the visas. We spend around 50,000 dollars for my studies. And I want to improve my carrier here and work for Reputation Company. My family adjusted for this culture and people. Now The government is asking to send us back. Now we need to change our food habits and culture habits everything. I am already 28 years and I don't have any kids. When I can start my carrier. All visa people are asking to give us opportunity. See our knowledge and skills.

Thank you,

Rega

rds,
