

ABC Enquiry

A submission by Peter Brohier

On the 20th November 2012 Mark Scott is reported as saying -

"The fact is that Tasmania does not have the scale and market to justify the high fixed costs involved in maintaining an internal television production unit and associated labour and infrastructure."

I am of the view that the Commonwealth has had every opportunity to give Tasmania the scale and market needed.

Also the Commonwealth can act in days to do so. This matter is being examined by the Head of the Department of Infrastructure in Canberra.

I would be pleased to give oral evidence as to how this may be achieved and the unit kept open and possibly even expanded .

No other region anywhere is capable of such an outcome, save for Tasmania.

The ABC could start with this as a feature story. Canberra is sitting on a gold mine.
