

sole owner of property noted below.

Do state the following, that due to the contamination of land from the RAAF Contamination to my home and land at SAL T ASH

I have personally been impacted personally, physically, emotionally and mentally in my life by the following

- I have lost my family, due to the stress and impact on them with the contamination, which resulted in all moving out, causing relationship breakdowns due to the stress of the contamination – I went from a family home to now leaving alone
- My health has been impacted with kidney problems
- Have also had a stroke – as to the stress of the situation with contamination
- No longer able to grow fresh fruit and vegetables
- No longer able own chickens for fresh poultry or eggs
- No longer able to catch / fish from creek and eat fresh seafood, as did when originally purchased
- Unable to have livestock on property

Therefore, I would like to state again that I now live on acres and the original intent and vision of property is no longer viable or able to move forward with initial plans and where once the property was an asset, it has now become a liability which is now costing me to maintain

Which has now made me feel like I have my feet nailed to the floor and have no life or future on this property.
