About this report

This report provides data about the permanent Migration Program administered by the Department of Home Affairs (the Department). This report does not include data on the permanent humanitarian program.

This report is published annually.

Data is sourced from several departmental visa processing and recording systems.

For privacy reasons, <5 has been used where a number in a table is between 1 and 4.

Further information about the Migration Program is available on the Department of Home Affairs website (<https://www.homeaffairs.gov.au/research-and-statistics/statistics/visa-statistics/live>)

Enquiries

Any comments or enquiries concerning this report should be sent to statistical.coordination@homeaffairs.gov.au.

Definition of terms

Activity:	For the purposes of Migration Program reporting, this refers to visa processing activity status and includes counts of lodgements, finalisation types (grant, refusal, withdrawal) and applications onhand. Activity data may also include second stage permanent applications that do not count toward the Migration Program ceiling.
ANZSCO:	Occupation data in this report utilises the Australian and New Zealand Standard Classification of Occupations (ANZSCO). ANZSCO is a standardised classification framework for collection, publication and analysis of occupation data. Further information on ANZSCO is available on the Australian Bureau of Statistics website (https://www.abs.gov.au).
Citizenship country:	The country of citizenship of the visa applicant or visa holder. Where a visa applicant or visa holder has more than one citizenship country, either the citizenship of the travel document or the citizenship nominated by the visa applicant is used.
Decisions:	A visa processing activity outcome where a decision-maker (including system-generated decision-making) grants or refuses a visa application.
Finalisations:	A visa processing activity outcome where a decision-maker grants or refuses a visa application, or the application is otherwise finalised by client withdrawal.
In Australia:	In this report, this term refers to the location of the client at the time the application was lodged. An applicant in Australia may already hold a visa of the same kind or may be applying for another type of visa.
Lodged:	Lodged is the count of applications receipted in a departmental office or submitted electronically.
Onhand:	A visa application that has been lodged but has not been finalised at a point in time. An application that is onhand may also be referred to as 'in the pipeline'.
Outside Australia:	In this report, this term refers to the location of the client at the time of lodging the application.
Outcome:	For the purposes of Migration Program reporting, outcome refers to the number of places that count toward the Migration Program ceiling, eg visas granted that count toward the Program. Outcome includes primary applicants as well as secondary/dependant applicants.

Where a visa has a permanent residence pathway, eg from a provisional or 'first stage' visa to a permanent or 'second stage' visa, the applicant is counted to the Migration Program at grant of the provisional visa.

Some visas granted during a program year may not count toward the Migration Program ceiling:

- If a person has been previously granted a visa which counted toward the Migration Program, that person will not be counted again.
- Similarly, when a visa is granted and subsequently cancelled in the same program year, the grant is considered as not having occurred (for the purposes of Migration Program outcome reporting) and is excluded.
- When a Partner visa applicant does not progress to the second stage (permanent) visa, a place is returned to the program.

- If a Business Innovation and Investment visa (granted in an earlier year) is cancelled under certain powers, a place is returned to the program in the year of cancellation.
- When these types of visa exclusions occur, this means that another person is then able to take that place within the Migration Program.

Places:	In this report, each grant that counts toward the Migration Program outcome is a place delivered against the ceiling of Migration Program places for the year. Where referring to Migration Program outcome within the report, the terms 'grant' and 'place' may be used interchangeably.
Primary applicant:	The primary applicant is the person who must satisfy the primary criteria for the grant of a visa under the Migration Regulations. Also known as the principal applicant.
Secondary applicant:	Secondary applicants must satisfy the secondary criteria for the grant of a visa under the Migration Regulations. In this case, a secondary applicant is generally a dependant of the primary applicant.
Region (major):	The major geographical region in which the country of citizenship of the applicant is located. Region groupings are determined based on the Australian Bureau of Statistics Standard Classification of Countries (SACC), 2016.
Region (minor):	The minor geographical region in which the country of citizenship of the applicant is located. Region groupings are determined based on the Australian Bureau of Statistics Standard Classification of Countries (SACC), 2016.

Background to the Migration Program

Australia's Migration Program is set annually, and runs from 1 July to 30 June of each year, similarly to the Australian financial year. The size and composition of the Migration Program is set each year through the Australian Government's Budget process.

Australia's Migration Program ensures we attract highly skilled migrants who support Australian values, do not displace Australian workers and support development in regional and low growth metropolitan areas. The Migration Program balances the needs of the Australian economy with pressures on our major cities, infrastructure and the environment, and ensures it will continue to support Australia's security, economic and social cohesion objectives now and into the future.

There are four streams in the Migration Program:

- The **Skill stream** is designed to improve the productive capacity of the economy and fill skill shortages in the labour market, including those in regional Australia.
- The **Family stream** is predominantly made up of Partner category visas, enabling Australian citizens and permanent residents to reunite with family members from overseas and provide them with pathways to citizenship.
- The **Special Eligibility stream** covers visas for those in special circumstances that do not fit into the other streams. This can include permanent residents returning to the country after a period away.
- The **Child stream** is demand driven and does not have a ceiling.

Some visas granted during a program year may not count toward the Migration Program outcome. If a person has been previously granted a visa which counted toward the Migration Program, that person will not be counted again. Similarly, when a visa is granted and subsequently cancelled in the same program year, the grant is considered as not having occurred (for the purposes of Migration Program outcome reporting) and is excluded. Additionally, when a Partner visa applicant does not progress to the second stage (permanent) visa, a place is returned to the program. If a Business Innovation and Investment visa (granted in an earlier year) is cancelled under certain powers, a place is returned to the program in the year of cancellation.

When these types of visa exclusions occur, this means that another person is then able to take that place within the Migration Program.

Where a visa has a permanent residence pathway, eg from a provisional or 'first stage' visa to a permanent or 'second stage' visa, the applicant is counted to the Migration Program at grant of the provisional visa.

Executive Summary

The total permanent Migration Program outcome for 2019–20 was **140,366** places.

The overall Migration Program includes a set of streams managed within a ceiling, as well as the Child stream, which is demand driven and does not have a ceiling.

The breakdown for those streams within the Migration Program, under the ceiling, was as follows:

- **95,843** places were delivered in the Skill stream;
- **41,961** places were delivered in the Family stream; and
- **81** places were delivered in the Special Eligibility stream.
- The outcome of Child stream for the year was **2,481** places.

This outcome is within the planning ceiling of 160,000 places set through the Government's budget process.

Outcome levels vary due to a number of factors, with the Department of Home Affairs committed to delivering the best possible migration outcome for the Australian community. The Migration Program outcome is consistent with the Australian Government's policy objectives of a two thirds Skill (69.5 per cent) and one third Family split (30.4 per cent).

COVID-19 had a significant impact on the outcome of the 2019–20 Migration Program, including due to disruption to supporting services such as English Language testing, biometrics and health and character checking. Categories that reached planning ceilings were Distinguished Talent and Skilled Work Regional (within the Regional category). Delivery in the Family Stream and Business Innovation and Investment category has been particularly impacted.

Overall Migration Program lodgements dropped by 12.3 per cent from 198,710 in 2018–19 to 174,170 in 2019–20. This was predominantly due to reductions in lodgements of 13.3 per cent in the Family stream and in Skilled Independent category of 67.4 per cent.

Since March 2020, delivery in the Skill stream has been strongly focused on responding to COVID-19, including subsequent economic recovery. The priority in the Family stream has been delivery of the onshore components of the program, where applicants could meet requirements, and to facilitate offshore partner and child cases with an urgent need to travel.

There were changes to visa categories within the Skill Stream of the Migration Program in 2019–20, including two new categories. The **Global Talent (Independent)** category was launched in November 2019 and is designed to attract highly talented individuals, with entrepreneurial ideas and cutting-edge skills within target industry sectors, who can contribute to Australia's economy by driving innovation and supporting the creation of local jobs.

The new **Regional** category was also introduced; this category supports stronger regional migration by ensuring the migration system supports regional business and drives skilled migrants to our regions. The Regional category incorporates Regional Sponsored Migration Scheme (RSMS; previously included in the Employer Sponsored category) and Skilled Regional (Provisional) (previously included in the Skilled Regional and State/Territory Nominated categories). The Regional category includes two new provisional subclasses, which were introduced in November 2019:

- Skilled Employer Sponsored Regional – including legacy Regional Sponsored Migration Scheme and the new Skilled Employer Sponsored Regional visa; and
- Skilled Work Regional – including legacy Skilled Regional (Provisional) and the new Skilled Work Regional visa.

Skill Stream

The Skill stream outcome was 95,843 places, which accounted for 69.5 per cent of the total 2019–20 Migration Program outcome (excluding Child stream).

Within the Skill stream:

- The Employer Sponsored category had an outcome of 29,261 places against a planning level of 30,000 places. Employer Sponsored visas comprised 30.5 per cent of the Skill stream outcome in 2019–20;
- The Skilled Independent category had an outcome of 12,986 places (13.5 per cent);
- The Regional category delivered 23,372 places against a planning level of 25,000 (24.4 per cent of Skill outcome). Of this, 15,000 places were delivered in Skilled Work Regional and 8,372 places in Skilled Employer Sponsored Regional;
- The State/Territory Nominated category delivered 21,495 places (22.4 per cent);
- The Business Innovation and Investment Program (BIIP) had an outcome of 4,420 places (4.6 per cent);
- The Global Talent category, which was launched on 4 November 2019, delivered 4,109 places against a planning level of 5,000 places; and
- The Distinguished Talent category had an outcome of 200 places (0.2 per cent).

Skill stream lodgements decreased by 11.6 per cent in the 2019–20 program year compared with 2018–19. There were 104,354 first stage applications received in the Skill stream in 2019–20 compared to 118,032 first stage applications in 2018–19. This decline was mainly attributed to the Skilled Independent category. However, lodgements increased in Regional category (40.6 per cent) and Distinguished Talent category (63.3 per cent) in 2019–20, compared to lodgements in 2018–19.

As at 30 June 2020, there were 86,692 first stage Skill applicants in the pipeline, a decrease of 7.1 per cent compared to the pipeline as at 30 June 2019.

In the Skilled Independent category, there were 11,821 applications in 2019–20 compared to 36,206 applications in 2018–19. In the Skilled Independent category, applicants located outside Australia accounted for 28.0 per cent of the outcome in 2019–20.

The Regional category accounted for 24.4 per cent of the Skill stream. This result includes outcomes from both legacy Regional visas and the new Skilled Work Regional visa (subclass 491) and Skilled Employer Sponsored Regional visa (subclass 494), which came into effect on 16 November 2019. Across this category, 27.7 per cent more Regional visas were granted in 2019–20 than were granted in 2018–19. Applicants intending to reside in Tasmania accounted for 3,936 (16.8 per cent) of the total places granted in the Regional category, which represents an increase of 132.6 per cent compared with the previous year.

There were 4,420 places delivered in the Business Innovation and Investment program (BIIP) against a planning level of 6,862 places. Lodgements increased by 5.8 per cent in 2019–20, with 15,784 first stage applications made compared to 14,922 first stage applications made in 2018–19. The BIIP pipeline increased over the 2019–20 program year by 36.3 per cent, from 23,223 applicants as at 30 June 2019 compared to 31,661 applicants at 30 June 2020.

The Global Talent (Independent) Program made up 4.3 per cent of the Skill stream. Applicants were granted in the following priority growth sectors:

- Quantum Information, Advanced Digital, Data Science and ICT (28%)
- MedTech (26%)
- Energy and Mining Technology (20%)
- AgTech (9%)
- Space and Advanced Manufacturing (8%)
- FinTech (6%)
- Cyber Security (3%)

Family Stream

The Family stream (excluding Child stream) delivered 41,961 places, which accounted for 30.4 per cent of the total 2019–20 Migration Program outcome.

Within the Family stream:

- The Partner category had an outcome of 37,118 places. It comprised 88.5 per cent of the 2019–20 Family stream outcome;
- The outcome of the Contributory Parent and Non-Contributory Parent categories were 3,730 places and 669 places, respectively; and
- The outcome of the Other Family category was 444 places.

Lodgements in the Family stream in 2019–20 were 13.3 per cent lower than in 2018–19. The pipeline at 30 June 2020 was 213,805 first stage applications, an increase of 4.7 per cent compared to the pipeline of 204,137 first stage applications as at 30 June 2019. The Partner category accounted for 45.1 per cent of the Family stream pipeline. Contributory Parent and Non-Contributory Parent categories accounted for 27.3 per cent and 23.5 per cent of the total Family stream pipeline, respectively.

Special Eligibility Stream

The Special Eligibility stream outcome was 81 places, which accounted for 0.1 per cent of the total 2019–20 Migration Program outcome.

Child Stream

The Child stream delivered 2,481 places, which accounted for 1.8 per cent of the total 2019–20 Migration Program outcome.
