

Dear sir/madam,

My name is -----I have been living here for two and half years.I came here as a student of hair dressing with my husband..Now I also applied for permanent residency in Australia.I have two kids but they are in India. I thought that after settlement and finishing study I will apply for them .

Australia is very good country for us .I learn so many good things from here .I also want that my children should also learn all those things which will be benefit for their future.But due to the changing of rules and regulations my dreams will never be fulfilled .My children who are very excited to come to this country ,I think their hope will mixed in the soil {think as a mother of children}

This amend ment senate bill 2010 ,changes will not only affect my life but also affecter thousands of lives.Mostly all of students do odd jobs and study as well as the requirements of DEMIA.If you want to play with the future of thousands of students life then why You give them Student visa .{ I think you are greedy people who earn millions of dollars from students now you make up your mind give them refund and terminate to their country.} Could you return the precious time, money , sacrifice and hard work of the students .On other hand could you return the childhood of their children who lost their children without their parents for example me.

It is very easy to say for you But feel that if you on the side of students.Feel that if it is happen with your own children if they will terminate from other country .I request you that Please donot changein the migration amendment .Must be keep in mind future of thousand of students.

With great hope ,

Yours faithfully .
