

To whom it may concern,

As an Australian, I strongly dis-agree on the Stronger Future Legislation. This proposed legislation means that the Australian Government will continue to violate the Aboriginal Communities human rights. I believe the Australian Government need to talk to the Elders of these communities for better management instead of such a harsh intervention..

Aboriginal people just want rights to be upheld not to be continually told what to do and how to do it.... The Australian Government needs to look at other interventions..
