Senator Slade Brockman  
Chairperson  
Senate Community Affairs Legislation Committee  
PO Box 6100  
Parliament House  
Canberra ACT 2600

Dear Senator Brockman

Thank-you for the opportunity to appear in front of the Senate Community Affairs Legislation Committee - Cashless Debit Card (CDC) public hearing on Thursday 12 October 2017.

During my evidence I was asked to provide the following detail subsequent to my evidence:

1. May to August 2017 crime statistics
2. Domestic violence statistics
3. My analysis of Wave 1 and Wave 2 evaluation reports
4. Areas where public drinking has reduced in Kununurra.

I provide the following detail in response to those questions on notice.

**May to August 2017 crime statistics including Domestic Violence statistics.**

Attached to this report are four documents titled:

- May 2017
- June 2017
- July 2017
- August 2017

Each of the attached documents provides each month's crime data within all of the Kimberley Police sub-districts, a comparison of those statistics to those of same month in the previous year and an accumulated figure for the year to date (July to June).

During my evidence, I outlined there is a lack of evidence to support the belief that the introduction of the Cashless Debit Card has contributed to an increase in crime in Kununurra.

I believe, there are 2 critical components to support my position.

It is true, coinciding with the start of the CDC, a discernible increase in Domestic Assault reporting occurred in Kununurra. During my evidence I asserted this change was aligned with a change in the Kimberley Police approach to their response to Domestic Violence task attendance.

On 1 May, 2016 Kimberley Police instigated a comprehensive change to its first response to Domestic Violence incidents. This response aligned Kimberley Police effort more closely to the WA Police Family Violence policy expectations. Greater oversight and increased expectation of attending Police Officers to the investigative standards executed at these incidents was undertaken, with particular focus on:

- Improved statement taking from victims and witnesses.
- More thorough forensic assessment at the scene of reported incidents.
- Better collection of perpetrator related evidence, particularly confessional evidence.

Additionally, in September 2016 a "Roadshow" was conducted by the District Family Violence Sergeant attending all Kimberley District Police Stations highlighting the expectations of the new approach and also educating Police Officers on WA Police Family Violence policy expectation.

This effort resulted in the identification of a greater number of violence based offences and, anecdotally, led to greater confidence within the community to reach out to Police during these incidents.

The data strongly suggests this effort was primarily responsible for Domestic Assault reports in 2016/17 across the Kimberley increasing to 2599 compared to 1948 in 2015/16, an increase of 33.4%. As discussed during my evidence, this is seen as a Policing success, enabling the connection of a greater number of vulnerable people with services to reduce that vulnerability.

This increase in Domestic Violence reporting is soundly linked to a change in the District Police approach to this serious issue. The attached crime data supports that proposition with significant increases in Domestic Violence reported across 10 of the 12 Kimberley Police sub-districts, including Kununurra.

Increases in property related crime in Kununurra did align with the introduction of the CDC. However, there were significant decreases in these crime types during the period May 2017 and August 2017 when the CDC was in use. The crime rates during this 4 month period, particularly when compared with the same period in the previous year, contradicts thought the CDC is responsible for increased crime rates.

In respect to the attached crime statistic documents, I provide the following overview of each month's data set to support my evidence from both a property crime and domestic violence perspective.

## **May 2017**

### Property related crime.

As per my evidence, May 2017 was the first month Kununurra saw a significant reduction in property related crime for a number of months.

The main points in this document, aligned with my evidence, are:

#### *Kununurra*

- Verified Dwelling Burglary in May 2017 (current month) were 7, Verified Dwelling Burglary in May 2016 (verified same month last year) were 13.
- Verified Non-Dwelling Burglary in May 2017 (current month) were 2, Verified Non-Dwelling Burglary in May 2016 (verified same month last year) were 4.
- Verified Motor Vehicle Theft in May 2017 (current month) were 2, Verified Motor Vehicle Theft in May 2016 (verified same month last year) were 6.

- Verified Theft in May 2017 (current month) were 16, Theft in May 2016 (verified same month last year) were 22.
- Verified Damage in May 2017 (current month) were 14, Verified Damage in May 2016 (verified same month last year) were 26.

## June 2017

The June document is valuable in that it not only provides monthly statistical data but the fact this is the final month in the reporting year it also provides the full reporting year comparison between 2015/16 and 2016/17.

### Property related crime.

I will start with the main points from a property related crime perspective:

#### *Kununurra*

- Verified Dwelling Burglary in June 2017 (current month) were 8, Verified Dwelling Burglary in June 2016 (verified same month last year) were 10.
- Verified Non-Dwelling Burglary in June 2017 (current month) were 1, Verified Non-Dwelling Burglary in June 2016 (verified same month last year) were 5.
- Verified Motor Vehicle Theft in June 2017 (current month) were 0, Verified Motor Vehicle Theft in June 2016 (verified same month last year) were 2.
- Verified Theft in June 2017 (current month) were 11, Theft in June 2016 (verified same month last year) were 31.
- Verified Damage in June 2017 (current month) were 25, Verified Non-Dwelling Burglary in June 2016 (verified same month last year) were 33.

#### *Kimberley District*

- For the full 2016/17 reporting year compared to the previous year a number of locations experienced significant increases in property related crime categories. Most notably Fitzroy Crossing experienced large percentage increases in multiple categories being Non Dwelling Burglary, Motor Vehicle Theft and Damage.
- Wyndham, subject to the CDC trial, experienced significant yearly declines in offending rates for Dwelling Burglary, Non Dwelling Burglary, Motor Vehicle Theft and Theft.

### Domestic Assaults

#### *Kimberley District*

- The data for all subdistricts (except Dampier Peninsula and Kalumburu) show Domestic Assault reporting increasing at significant rates in 2016/17 compared to 2015/16 aligned with the increases in Kununurra. This is clearly defined in the columns titled Verified Previous YTD, Verified Current YTD and Verified Change from Previous YTD. As previously stated, I believe this is a compelling data set showing the change of District Domestic Violence response standards was the reason for increased Domestic Violence reporting across most of the Kimberley. This widespread increase across the Kimberley, not just Kununurra, dismisses the CDC as the causal reason in Kununurra.

## **July 2017**

### Property related crime.

#### *Kununurra*

- Verified Dwelling Burglary in July 2017 (current month) were 4, Verified Dwelling Burglary in July 2016 (verified same month last year) were 3.
- Verified Non-Dwelling Burglary in July 2017 (current month) were 5, Verified Non-Dwelling Burglary in July 2016 (verified same month last year) were 2.
- Verified Motor Vehicle Theft in July 2017 (current month) were 5, Verified Motor Vehicle Theft in July 2016 (verified same month last year) were 3.
- Verified Theft in July 2017 (current month) were 17, Theft in July 2016 (verified same month last year) were 35.
- Verified Damage in July 2017 (current month) were 21, Verified Non-Dwelling Burglary in July 2016 (verified same month last year) were 27.

## **August 2017**

### Property related crime.

#### *Kununurra*

- Verified Dwelling Burglary in August 2017 (current month) were 5, Verified Dwelling Burglary in August 2016 (verified same month last year) were 9.
- Verified Non-Dwelling Burglary in August 2017 (current month) were 1, Verified Non-Dwelling Burglary in August 2016 (verified same month last year) were 8.
- Verified Motor Vehicle Theft in August 2017 (current month) were 5, Verified Motor Vehicle Theft in August 2016 (verified same month last year) were 9.
- Verified Theft in August 2017 (current month) were 16, Theft in August 2016 (verified same month last year) were 47.
- Verified Damage in August 2017 (current month) were 29, Verified Non-Dwelling Burglary in August 2016 (verified same month last year) were 42.

## **May 2017 – August 2017**

### Property related crime.

#### *Kununurra*

Cumulatively, over these 4 months there were:

- 35 Dwelling Burglaries in 2016 compared to 24 in 2017.
- 19 Non Dwelling Burglaries in 2016 compared to 9 in 2017.
- 20 Motor Vehicle Thefts in 2016 compared to 12 in 2017
- 135 Thefts in 2016 compared to 60 in 2017.
- 128 Damages in 2016 compared to 89 in 2017.

## **My analysis of Wave 1 and Wave 2 evaluations.**

My summation of the Wave 1 and Wave 2 results (behaviours pre and during CDC implementation) are as follows:

- A reduction in alcohol consumption, both quantity and frequency, amongst a considerable percentage of respondents.
- A reduction in drug use, amongst a considerable percentage of respondents.
- A reduction in gambling, amongst a considerable percentage of respondents.
- Crime statistics did not improve.
- Better care for kids by respondents, but they thought their children were worse off.
- Some respondents felt they were being penalised and/or discriminated against by being forced on the card.
- Difficulties in conducting all transaction types on the card.
- Increased humbugging of vulnerable community members.

As a Police Officer and being exposed daily to the unacceptably high rates of alcohol related violence across the Kimberley the CDC evaluation provided many positives towards improved community welfare. Whilst crime rates did not improve in Kununurra there have been excellent results in this area in Wyndham during the CDC trial period. Similar to Kununurra I cannot say whether the change in Wyndham crime statistics is linked to the CDC.

Kimberley Police were particularly vigilant to increased “humbugging”, particularly of seniors, during the CDC trial. Advice I have received is there has been no change in complaints made to Police about this style of incident. There have been incidents reported during the trial but are low in number and consistent with historic averages.

I recognise the negative connotations for a number of recipients of the CDC. I am aware of the community panel where people are able to apply for increases in the cash component within the CDC and efforts have been made to rectify the short comings of electronic transactions in various situations. I am hopeful those that have improved the quality of their life on the CDC become the inspiration for those that have not been so receptive to its implementation.

## **Areas where public drinking has reduced.**

I have made contact with Kununurra Police to confirm the information they have previously provided me about a reduction of public drinking during the CDC trial period and I am advised those areas are referred to as White Gum Park and Messmate Strip.

## **Conclusion**

As outlined in my evidence I am a supporter of the CDC for its ability to reduce alcohol consumption in an environment where excessive alcohol consumption is a significant aggravating factor in an unacceptably violent Policing district.

I see the CDC as an important part of a broader suite of alcohol suppression tactics to return a greater degree of functionality to the Kimberley. That suite of alcohol suppression tactics also include:

- A broad geographical zone where there is a reduced and consistent supply of take-away pre-packaged alcohol.
- A Banned Drinker Register precluding purchase of alcohol by people that have recent history of alcohol related violence and disorder.
- More effective state based “sly grogging” laws to overcome criminal entrepreneurs targeting judicially approved alcohol restricted communities.
- Points 1 and 2 are aided by an IT system to manage adherence to these alcohol suppression tactics.

The Kimberley Police District is undertaking extensive community consultations to progress the implementation of this broad approach to reducing, as I say, the appalling levels of alcohol related violence in the Kimberley.

Whilst I strongly believe significantly reducing alcohol supply and demand will deliver immediate benefit to a large portion of the Kimberley community, I fully accept the longer term sustainable way forward is improving the access to and involvement of the entire Kimberley community in quality Health care, Education, Housing and Jobs. I have also learnt during my tenure in the Kimberley, for Aboriginal people, participation and connection to strong positive culture and country is a critical component towards achieving positive liyan, a Kimberley-wide Aboriginal word for feeling.

I appreciate the invitation to participate in this hearing and if there are any further questions I am available to respond.
