

Respected Sir,

I came as a student here three years back in Hospitality Management at the time it was booming trade. I did my studies, showed my 900 hours to TRA, after studying here, as I was interested in settling in Australia, I applied for TR having achieved the English requirements. Then I got My TR last year and as it was proposed in rules to show one year experience in your own trade. I started working as a cook. I also applied for State Sponsorship, which was closed soon after for indefinite period, so I applied Permanent Residence after completing one year experience as a cook, now it's been one year waiting, and after achieving everything what immigration people asked for, still the situation is in mess. It's almost the story of every student, So after spending three precious year of my life, still I stand no where if this bill will be accepted. It seems to be totally unfair, if you look from each and every student's point of view, it will heartbreaking and who knows many people won't be able to digest it.

So it's a heartiest request that it should not be passed at any cost, it looks really unfair.
