Senate Enquiry into Wind Farms

Dear Sir / Madam,

In making this submission, I must first state that I am under contact to Pacific Hydro as regards to their Crowlands Wind Tower Project.

I will not be setting out what I believe to be the pros and cons of Wind Tower development as these I am sure have been fully canvassed by other submissions. I would like, however, to bring to the attention of the Committee the complete lack of any viable alternative in Australia's current energy policies.

As the Australian Government's, past and present, have completely failed to expand non-fossil energy sources, wind power has become the only 'game in town'. If Australia is to reduce its CO2 emissions in the near future it can only realistically do so using wind energy.

Thank you for considering my opinion.

Yours Faithfully

Gerry Bolt (Mr)
