

**Joint Standing Committee on the National Broadband Network**

**Answers to Questions on Notice**

**Committee Hearing 15 August 2018**

**NBN Co Limited**

**Question No: 25**

**NBN Co Limited**

**Hansard Ref: Written, 22/08/2018**

**Topic: FTTN under 25Mbps**

**Mr Brian Mitchell, MP asked:**

How many premises on FTTN are currently receiving a layer 2 speed of 25 Mbps or less?

**Answer:**

As nbn has said previously, there is a small proportion of premises (approximately 5%) that cannot achieve 25 Mbps during the coexistence period, when nbn intentionally powers down the network to avoid interference with existing services.

Where the network is not capable of providing the minimum wholesale download speeds after coexistence has ended, nbn will take action to rectify any issues so that minimum standards are met.
