

Dear senates,

I am writing to express my objection to the Migration Amendment (Visa Capping) Bill 2010.

My name is, I am a graduated overseas student of Wollongong. I applied PR and graduated Bridge Visa A.

If this bill comes to effect, it may damage the national benefit of Australia, because general skilled migrants, like me and my classmates, can not contribute our skills and knowledge to Australia. Many overseas students study hard in their areas and they get high marks on schools. They love Australia and they want to use their professional skills on work after graduation. That's why they apply for PR. In addition, when we are living in Australia, we work hard and pay tax every year. We can feed ourselves and our family using our skills, rather than government's welfare. However, if this bill passes, we can not continue to contribute to Australia.
