I had to constrate in my studies that's why we did compromise,

Now he is with us for last one year and he is settle-down here and enjoying in Australia.

I have spended more then \$ 40,000 here just for my bright future. Refunding money is not a

right solution because no one can refund time.Cooking is my passion, that why we arrived in

Australia.

This is my dream to be a citizen of Australia.I do really respect Australian laws,rules regulations,and culture, so that's why i never go for the shortcuts.

We don't want to go back, we have dream to raise my son here, now we emotionally attached

and get habitual to live here.

If we will have to go back to India we will be behind four years of our life.

So please kindly think about those people who arrived here with lots of dream and lived without their families,friends and have been waiting for long time

And specially for those who were truthful for laws.

We are looking for your positive response from you and hope you will consider into this matter seriously.

thanking you

yours sincerely

Dhruv
