

Subject: legalizing medical cannabis
Date: Sunday, 22 February 2015 6:27:44 PM

I am writing this on behalf of my wife who has stage 4 melanoma and has been told that her medical treatment has not worked and that there is nothing medically left to help her. If natural cannabis was available legally and for only medical use then my wife would have a chance to beat this deadly disease and watch our 2 young children grow up and have families of their own.

We think that it is criminal to not allow someone a chance to live, what if it was someone that you loved, wouldn't you want to try every possible thing to help them to live?

All we are asking is that if someone has exhausted every possible medical solution to ones terminal condition then surely they should be able to try cannabis and not worry about being treated like a murderer, rapists or harden criminal just because they want to live.

Please consider all the mothers, fathers and children whom you will be giving a lifeline to if you pass legislation allowing cannabis to be used for medical only purposes.

Regards,

Troy and Sue Stone
