

To:- Senate Legal and Constitutional Affairs Committee
From:- Allan Choveaux,

Dear Senators of the government of Australia.

On behalf of the Australian people, you are considering the proposition that something **unnatural** can be made **natural**, by government legislation??!!

In the process, you are considering **undermining and degrading the marital act and the true family unit**, the strength of the nation??!!

History will look back on the politicians of this era of lunacy with astonishment and disbelief!!

It is taught and I believe it true, that the human being knows in his heart what is good and what is evil and so, I believe that you know what you should do, and that is:-

recommend rejection.

My compliments.

Allan.
