Dear Sir/Madam

As a buyer for Honey, we have continued to experience shortages in 2013 year in this industry to the point that we had to explore importing this product. However given the risks that were highlighted in China and India, we have continued to source local honey and believe that this is the position that would like to maintain.

Australian Honey is a great product and used in the factories to make a number of products and we would like to extend our support to improving the outlook of this vital industry.

Kind Regards

Vinesh Chand
