

Dear MPs

Pornography is causing an epidemic of harm to young people in Australia. It is a travesty that the average of exposure to porn is 11yo and it is nothing like what we grew up with decades ago. It is destroying the future relationship of our young men and women we must do all we can to stop this harm.

The UK is leading the way in seeking to ensure that kids don't have easy access to porn sites, let us follow their example. Age verification is essential to take this disaster seriously.

Yours sincerely

Scott Berry
