

To Whom it may concern.

I'm a current shareholder of DSH who's now lost money because of lack of transparency by the previous management at DSH.

I've basically lost 25 % of my life savings that I invested.

If only I new about the real debt I wouldn't have purchased the stock on the 03/12/2015.

Whilst they were in Voluntary Administration, I did some ground work, trying to put things together, because again nothing was clear, lack of communication and disclosure by DSH.

Looks like they drew down \$43.5m in debt during Jul-15 (i.e. straight after balance date) to bring in more inventory and pay down creditors.

Suspect Nov-15 contains part of the \$60m inventory impairment charge in GM figures. Dec-15 looks disgraceful.

Looks like a large asset impairment charge went through in Dec-15 as well.

In short, the company was destroyed on the numbers in nov and dec FY16. Two months. Ouch! (and no public disclosures). I cannot see how they ended up at 140m secured creditor debt. What am I missing?

How did CODB increase so much in Dec 16? looks like Dec15 was about 6 times nov 15 and same with dec16 being 6 times nov 16 with a much higher number?

Me, and the rest of the shareholders were misled and lied too.

Before purchasing the DSH shares I did some research on their profits etc.

Especially on June 2015 DSH declared a record profit of 29.5 million in cash.

Debt rose very quickly, but management said in an audio conference that it's not an issue.

What's he saying to us shareholders? Relax it will be OK?

Australia has become the worst place when it comes to the stock market.

Imagine how this could affect our superannuation funds?

I've totally lost faith in the ASX, ASIC.

We need someone to step up and help us shareholders. Why is it that we are last on the line and 99% of the time we get zero?

There's been lots of news on how employees will be looked after.

Gift vouchers will be granted.

What about the tens of thousands of dollars that us mums and dads have lost.

Gift vouchers? Are you serious? If that's all I had and it wasn't granted, I couldn't care less of a few hundred dollars.

I ask you kindly, can someone with power and who isn't afraid, please help us shareholders, because in my opinion ASIC isn't doing enough or they are under-resourced.

Thank you.
