## **Inquiry into Treasury Laws Amendment (GST Low Value Goods) Bill 2017**

### **Submission by DHL Express (Australia) Pty Ltd**

DHL Express (Australia) Pty Ltd ("DHL") is a member of the Conference of Asia Pacific Express Carriers (Australia) Limited ("CAPEC"). Notwithstanding CAPEC's submission to the above-mentioned inquiry, DHL wishes to state its position in respect of the *Treasury Laws Amendment (GST Low Value Goods) Bill 2017* ("Bill").

DHL's position can be summarised as follows:

- DHL endorses the recommendations of previous Government-appointed bodies, including the Productivity Commission and Low Value Parcel Processing Taskforce, which found that the cost of GST collection at the border (upon arrival) would exceed any GST revenue gained, resulting in a net welfare cost.
- DHL supports the Bill, in so far as it endorses a fairer tax system through a Vendor Collect Model ("VCM").
- DHL does NOT support the obligation proposed under the Bill, which requires the Vendor Registration Number ("VRN") information to be captured and reported by air express carriers.
- It is DHL's firm view that the information flow should be directly between the overseas vendor and the Australian Taxation Office ("ATO").
- Accordingly, DHL requests that the Bill be amended so as to reflect such an information flow. Note: suggested amendments to the Bill are appended to this submission for the Committee's consideration.
- DHL endorses two alternate models to collect the VRN information:

- (1) Vendor Self-Collection and Audit - Upon registration, the overseas vendor agrees to provide periodic reporting to the ATO on what it ships to Australia and what GST it collects; and/or
  - (2) Use of Existing Data - The existing process for reporting low value shipments in the Integrated Cargo System, i.e. via an Air Cargo Report, which provides a range of data to assist the ATO undertake its compliance monitoring. This data includes:
    - Full name and street address of the overseas vendor
    - Full name and street address of the consignee/importer
    - Pieces
    - Weight
    - Currency
    - Country of Origin
    - Commodity
    - Declared Value (AUD)
- DHL understands that Australia Post will be exempt from reporting the VRN. This represents an extremely important aspect of the Bill, namely:
    - Australia Post is on record as stating that it is a direct competitor to companies such as DHL
    - The exemption creates an advantage for Australia Post which is may be seen as being anti-competitive in nature
    - It is not unreasonable to suggest that the exemption will encourage more consignments to be imported via the postal stream, which is a less data rich pathway in terms of pre-arrival risk assessment by Australia's Border Agencies

DHL therefore supports the VCM in principle, however is strongly opposed to the imposition of having to collect and report additional VRN data on consignments of Low Value Goods due to the fact that sufficient data is already provided to the Border Agencies. Moreover, the exemption of Australia Post from the VRN reporting requirements creates an uneven playing field that is anti-competitive in nature.

DHL would ask the Senate Economics Legislation Committee to carefully consider this submission, along with the CAPEC submission, which contains additional information regarding the Bill.

Yours Sincerely,

Ben Somerville  
Customs & Regulatory Affairs Manager, Oceania
