

**Submission regarding ‘Exchange of Naval Nuclear Propulsion Information Agreement’ (ENNPIA)**

It is not a good idea for the UK and the US to share information on building nuclear submarines with Australia.

It is not a good idea for Australia to build nuclear submarines.

It is not in Australia’s interest or the interest of safety in our region or the interest of world peace.

It is also an undemocratic proposal.

It is a terrible idea and it should be stopped.

Thanks for accepting my very brief submission.

Andrew Williams
