

WAKE UP AUSTRALIA!!!!

I am a beef producer who supplies clean green product to Australian and overseas consumers. This meat could be grown organically if governments in Australia stopped hindering production and perhaps even helped us to achieve this goal! People have to eat.....would you rather consume our local product OR have imported produce, often with little or unknown quality assurance??

To remain viable we need clear property rights NOW.

GET OFF OUR LAND and let us get on with producing FOOD and INCOME for Australia!!

God save Australia.

Peter Blake.
