

Dear Committee Secretary

This country needs a justice revision board for all child offenders, no matter what colour !

As you know many of our children in this country are going astray and getting lost in the prison system, whether this is due to poor conditions in family, income and no positive role models or mentors in their current life.

Children instead of learning from their mistakes are written off by police, govt departments etc and end up in the prison system.

There needs to be a revision board with neutral lawyers and police that gives child offenders a pathway for education, skills, normal life.

**Thanks
Tracy**
