

I think this is really unfair for the people who are waiting for the result of their applications and also who just apply for it. Students who are here from minimum two years they spend lots of money.

I am here from two years, I paid \$25,000 for my course + medical for 2 years \$1400 and there are no facilities for as students they have to pay full train fair and wherever they go they are discriminated as they are student doesnt matter how good they are? After facing all these problems when they apply for PR even then they are not able to get it. What about their future you people dont think about it, you say that you are not responsible for it then who is responsible? These rule that you changed. Please think about those people whose future is going to be ruined after your this decision..
