**Subject:** Committee Query Response: City of Sydney Consultation [SEC=OFFICIAL]

Dear Secretariat,

Thank you for your time on Thursday. To follow up on the Committee's query regarding consultation with the local council:

The City of Sydney was contacted on 29 September 2025 regarding the decommissioning of the National Research Cyclotron Facility at Camperdown.

As part of the Environment Protection and Biodiversity Conservation (EPBC) Act environmental assessment process, ANSTO is required to publicly exhibit project documentation. In coordination with the City of Sydney, arrangements were made to display materials at the Glebe Neighbourhood Service Centre, a recognised location for development-related public information.

From 13 October to 7 November 2025, two hard copies of the Preliminary Documentation and attachments, along with notices inviting public comment, were exhibited at the Centre. The formal public consultation period ran from 13 October to 24 October 2025, with updated notices confirming the close of the consultation period remaining on display until 7 November 2025.

No public submissions were received during the consultation period.

In addition, it is our intention to engage further with the City of Sydney and showcase the decommissioning plans in greater detail in the coming months.

Kind regards,

**Leah MITCHELL**  
**Senior Advisor Government Affairs**
