A M R O B A

To clarify AMROBA position re pilot training, we support the introduction of CASR Part 61 independent flight instructors as per FAR Part 61.

In relation the AME training, we are working with Infrastructure to make the Federal Education Department responsible for the first time to educate and qualify AME trades persons to the convention's Annex 1 standards.

Both will be a more cost effective system to get the base training to attract entry into aviation.

Subsidising advanced training has not been proposed by AMROBA.

We want the basic entry level opened up to attract new personnel.

Regards

Ken Cannane
AMROBA

Safety All Around.
