Dear Hon: Minister,

I lodged my application sub class 886 for hair dresser 31 st December 2008 and I am waiting and waiting to finalise my application .

I have been living in Australia since 2005 June with two kids and my wife. My kids started learning and doing everything according to the Australian culture and they cant speak my native srilanka sinhala language. I have understood the current changes which discussing in parliment at this stage

definitely going to effect my application as well. Further if these changes will stop our future and probably we might have to go back to srilanka without our permanent residency. I strongly believe it is not fare for us after studying and living here for 5 years.

On the other hand asylum seekers from Srilanka , come here to earn money and they enter to Australia illegally and getting better life. But we finished our studies without any government support and once we got qualified skills qualification you keep changing the law. It is not fare. therefore I kindly request from you please do the justice for me and my family ,specially my kids education going to distroy if we will have to go to srilanka.

Kind regards

Dininda herath
