

I am not in support of new visa & immigration law (capped) as it will produce negative effect among the prospective immigrant. Demand & supply of few skill occupations is temporary phase in the market. It doesn't mean that we have to be so harsh with their visa applications. After certain period of time these occupations come again in demand as it was couple of years ago. To consider the future of young immigrants, those will become productive part of the society later in future. Education Industry is a third biggest revenue generator for Australia. According to the The Hon Julia Gillard MP

“International education has made a significant contribution to Australia. It has grown to now be our third largest source of overseas earnings, generating \$15.5 billion in 2008 and supporting more than 125,000 jobs. In 2008, nearly half a million students came to Australia. It is the lead sector in terms of export earnings in Victoria and the second largest in New South Wales”
