IHMS

A quarterly summary of IHMS incidents by category between January 2010 and June 2011 is attached. The department is unable to provide a quarterly summary of these Incident Reports by centre in the timeframe requested by the Committee.

IHMS Incident Report figures will include a high level of double counting where the incident covered more than one category.

IHMS Incident Reports for the period January 2008 to December 2009 are not able to be provided in the time frame given, because these incidents occurred prior to changes to the IHMS reporting system that enabled electronic recording and recall of incidents. Incident Reports prior to this were created manually and individually attached to each client record.
