

Respected sir,

I am writing you regarding the new law which you going to summit

On 15th June 2010 . Well as long as I read and can understand it. It seems

Like we all have to go back our country. Since I came in 2007 i put my hard

Work to stay here and make Australia my second home. I done my study and

On top of that i work 900 hours as a volunteer in hairdresser shop. I know that

I going to get my work rewarded later on .I can't forget those days when i work for free

It was almost like a year.

It's been almost a year a year i applied for skilled migration (487).since then i saw lots of

New Rules come out .So those who still studying they can prepare their self .

Which make Sense to everyone . And quiet fare as well.

But the one you bring for former students who already applied for their further visas.

It seems quiet unfair with everyone. Because we done lot of hard work and spend thousands

Dollars to do that. More over our precious time .

If that law got passed out. Then it going be biggest black out for anyone who believe in

Democracy .And can ruin Australian image in internationally. And also those people will

Give consideration to their decision to migrate Australia. Because of the uncertainty of rules.

My humble request is to you that please stop this new law or give it a brief consideration Before summing it.

So those who going lose their life after this will survive.

With regards

Ajaybansal
